CSS Rounded Corners

< Previous

Next >

CSS Rounded Corners

With the CSS `border-radius` property, you can give any element "rounded corners".

CSS border-radius Property

The CSS `border-radius` property defines the radius of an element's corners.

Tip: This property allows you to add rounded corners to elements!

Here are three examples:

1. Rounded corners for an element with a specified background color:

Rounded corners!

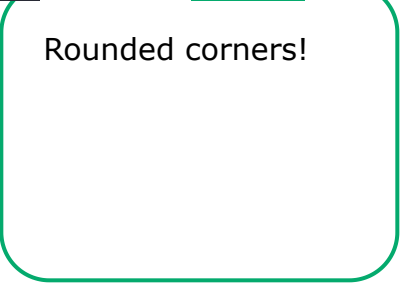

HTML

CSS

JAVASCRIPT

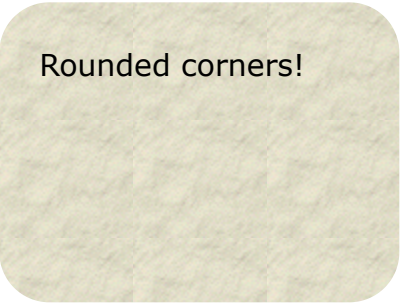

Rounded corners!

3. Rounded corners for an element with a background image:

Rounded corners!

Here is the code:

Example

```
#rcorners1 {  
  border-radius: 25px;  
  background: #73AD21;  
  padding: 20px;  
  width: 200px;  
  height: 150px;  
}  
  
#rcorners2 {  
  border-radius: 25px;  
  border: 2px solid #73AD21;  
  padding: 20px;  
  width: 200px;  
  height: 150px;  
}  
  
#rcorners3 {
```

```
padding: 20px;
width: 200px;
height: 150px;
}
```

[Try it Yourself »](#)

Tip: The `border-radius` property is actually a shorthand property for the `border-top-left-radius`, `border-top-right-radius`, `border-bottom-right-radius` and `border-bottom-left-radius` properties.

CSS border-radius - Specify Each Corner

The `border-radius` property can have from one to four values. Here are the rules:

Four values - border-radius: 15px 50px 30px 5px; (first value applies to top-left corner, second value applies to top-right corner, third value applies to bottom-right

Three values - border-radius: 15px 50px 30px; (first value applies to top-left corner, second value applies to top-right and bottom-left corners, and third value applies to bottom-right corner):

Two values - border-radius: 15px 50px; (first value applies to top-left and bottom-right corners, and the second value applies to top-right and bottom-left corners):

One value - border-radius: 15px; (the value applies to all four corners, which are rounded equally):

Here is the code:
