

Sublime text: edit all occurrences of variable without highlighting

Asked 7 years, 5 months ago Modified 7 years, 5 months ago Viewed 5k times

In Sublime Text, you can edit all occurrences of a word by highlighting the words with `alt+F3`, and then typing whatever you want to change the word to. Is there a way to edit the multiple occurrences of the word without having to specifically highlight it?

sublime-text

Other than using ctrl+h "Replace All" ? You can also use "Tools" -> New Snippet to write script to automatically replace words. – JustMe Mar 12, 2016 at 15:35

If you have your mouse caret (blinking pipe |) on a word and you press `ctrl-d` (Windows) or `cmd-d` (Mac) you can select the current word & if you press `ctrl-d` afterwards that it will select other repeat occurrences of your selection.
